

Harsh Vadhvana

Ahmedabad, Gujarat, India , harsh.vadhvana7@gmail.com , +91-9228229572 , LinkedIn , GitHub

OBJECTIVE

- Aspiring AI/ML enthusiast student with a strong foundation in Python, machine learning, data structures, and algorithms. Adept at problem-solving and enthusiastic about developing innovative, data-driven solutions.

SKILLS

Programming Languages: Python, Java, C, C++, JavaScript, HTML, CSS, React.js, Node.js

Database: MySQL, SQL, MongoDB, NoSQL, PostgreSQL

Tools: Google Collab, VSCode, Tableau, Excel, AWS, Postman, Git, GitHub

Libraries: Pandas, Matplotlib, Seaborn, OpenCV, TensorFlow, PyTorch

Concepts: Machine Learning, Data Structures, Data Science and RESTAPI

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

New LJ Institute of Engineering and Technology | Ahmedabad

November 2022-May 2026

CGPA: 8.2

- **Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks, Web Development, Python for Data Science, Machine Learning.

EXPERIENCE

InfoLabz Ahmedabad, Flutter Intern

June 2026 – July 2026

- Developed and optimized UI components using Flutter and Dart for mobile applications.
- Implemented responsive layouts ensuring compatibility across Android and iOS devices.
- Integrated RESTful APIs to fetch and display dynamic data in the application.

Grownited Private limited, AI/ML Intern

January 2026 – April 2026

- Developed an AI-powered Helmet Detection System using YOLOv8 and OpenCV to identify helmet compliance among two-wheeler riders.
- Applied Python, NumPy, Pandas, PyTorch, and OpenCV applied for data preprocessing, model training, and real-time detection.

PROJECTS

Helmet Detection System

- Built an AI-based helmet detection system using YOLOv8 and OpenCV.
- Developed Flask APIs for image processing and object detection.
- Created a React frontend for image uploads and result visualization.
- Implemented custom object detection models for helmet compliance monitoring.
- Implemented automated image preprocessing, object detection, and bounding-box visualization.

Expense Tracker

- Built a full-stack expense tracker web application using HTML, CSS, JavaScript and MongoDB.
- Optimized MongoDB queries with indexes and schema design, enabling faster retrieval of expense history.\

CERTIFICATIONS

- **Amazon Web Services**
Issued By: Royal Technosoft P LTD
- **Data Structure and Algorithms**
Issued By: Royal Technosoft P LTD
