Summary

Data and Business Analyst with 2+ years of experience building dashboards, automating ETL pipelines, and delivering forecasting and segmentation models that drive revenue and retention. Cut manual reporting time by 40% and improved forecasting accuracy by 15% across e-commerce and B2B environments. Skilled in SQL, Python, Power BI, Tableau, and AWS, with proven strength in stakeholder communication, requirements gathering, and translating business needs into actionable insights.

Experience

Data Analyst, E-Commerce

March 2025 – Present

Matrix Furniture Group | Saddle Brook, NJ

- Built 10+ Power BI and Excel dashboards tracking conversion, revenue, and retention KPIs, reviewed weekly by the VP of Sales and operations leadership.
- Engineered automated SQL and Python ETL pipelines from ERP-aligned datasets (orders, inventory, billing), reducing manual reporting time by 40%.
- Integrated third-party data via REST APIs, eliminating 5+ hours of manual exports weekly and improving data consistency by 25%.
- Developed a Python sales forecasting model that improved demand planning accuracy by 15%.
- Partnered with sales and operations teams to gather requirements and deliver A/B test analysis that informed pricing and merchandising strategies.
- Optimized complex SQL queries (joins, CTEs, window functions), accelerating ad hoc analysis and recurring reporting by 30%.
- Performed data validation and quality checks across source systems, documenting data definitions and reporting logic for 20+ business users.

Data Analyst

December 2023 – January 2025

Grownited Private Limited | Ahmedabad, India

- Automated extraction of 500+ PDF reports in Python, cutting data prep time by 30% and reducing reporting errors by 20%.
- Built Tableau and Excel dashboards tracking customer behavior KPIs; churn and cohort analysis drove a 15% lift in customer retention.
- Streamlined Salesforce CRM and lead-tracking workflows, improving lead capture accuracy by 30% and achieving 95% on-time delivery.
- Deployed AWS ETL pipelines (S3, Redshift) consolidating 5+ data sources into a unified reporting layer.
- Conducted exploratory data analysis in Python (Pandas, NumPy) to uncover trends, driving data-backed recommendations adopted by leadership.
- Collaborated with cross-functional stakeholders to define KPIs and requirements, presenting insights to non-technical audiences across 3+ teams.

Data Analytics Instructor (Part-Time)

January 2023 – November 2023

Royal Technosoft Pvt. Ltd. | Ahmedabad, India

- Designed and delivered curriculum in SQL, Python, Excel, and data visualization for 50+ students, achieving a 90% satisfaction rate and 35% increase in project completion.
